

CI - RSSSE Routing and Switching Solutions for SEs v2.0

Summary

Duration

2 Days

Vendor

Cisco

Category

Routing and Switching

Introduction

Offers System Engineers (SEs--primarily in Channel Partners) an update on SONA architectures, advanced technology categories, current routers (up to Cisco 7XXX) and switches (up to Catalyst 65XX), and other design task content.

Prerequisites

CCDP or comparable experience recommended

Course Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe SONA Framework (including Baselines), Advanced Technology Categories (as related to routers and switches).
- How to choose a Router or switch for the design solution.
- Practice designing an advanced technology-ready network solution case study.

Course Outline

- SONA Overview
- 2. Advanced Technology
- 3. Choose Routing and Switching Solutions
- 4. Design an Advanced Technology Ready Organization

Associated Certifications & Exams

The 642-061 RSSSE Routing and Switching Solutions for System Engineers exam is the exam associated with the Cisco Routing and Switching Solutions Specialist certification.

On successful completion of this course students will receive a Torque IT attendance certificate.
