

## LPIC - 1

### Linux Professional Institute Certification Module 102

#### Summary

**Duration**

3 Days

**Vendor**

LPI

**Category**

Introduction

#### Introduction

This course provides students with basic knowledge and skills for the Linux user/administrator that are common to major distributions of Linux.

After completing this course, students will gain skills to customise the shell environment, install and configure essential system services such as printing and be able to configure network settings.

#### Prerequisites

Attendees of this course need the skills taught in LPI-101.

#### Key Course Objectives include:

Install and configure X11

Customise the shell environment

Writing simple shell scripts

Automating system administration tasks

System logging

Managing printers and printing

Basic networking configuration

Troubleshooting network issues

System Security

Configure client side DNS

#### Associated Certifications & Exams

On successful completion of this course students will receive a Torque IT attendance certificate.

This course is the second of a two-course path towards the LPI-1 certification, students has to complete exam 101 and 102 for this certification.
